

MOHAMED NASSER

Flutter Developer | Cross-Platform Mobile App Specialist

Email: mohamednasser12315@gmail.com

Phone: [+201227627220](tel:+201227627220)

GitHub: <https://github.com/mohamednaser2001?tab=repositories>

Address: Cairo / Egypt

LinkedIn: <https://www.linkedin.com/in/mohamed-nasser-443176227/>

Flutter Developer with 5 years of experience in building cross-platform mobile applications using Flutter and Dart. Skilled in enhancing user engagement, optimizing app performance, and integrating third-party services (APIs, Firebase, payment gateways). Experienced in Agile team environments, delivering scalable and production-ready apps for both iOS and Android. Strong focus on clean architecture, state management, and creating high-quality mobile solutions tailored to user needs.

EDUCATION

- **Bachelor's degree in computer science**
El-Shorouk Academy | 2019 – 2023
Cairo / Egypt
- **Software Engineering Diploma**
Instant Center / Egypt 2021

EXPERIENCE

Flutter Developer | E-Motion Agency Oct 2024 – Present | Cairo, Egypt

- Architected and deployed scalable mobile solutions across diverse sectors (Real Estate, Aviation, B2B) using Flutter and Dart with Clean Architecture and MVVM patterns.
- Engineered custom, lightweight utility functions to reduce reliance on third-party packages, optimizing overall app bundle size and maintainability.

Flutter Developer | ONVACA June 2024 – Oct 2024 | Cairo, Egypt

- Led the end-to-end technical delivery of a complex SaaS legal platform, managing complex state synchronization between environments.
- Conducted deep codebase refactoring to resolve critical lifecycle and memory-leak issues, resulting in highly stable production releases.

Freelance Flutter Developer Feb 2024 – June 2024 | Remote

- Acted as the primary technical consultant for international clients, delivering over 8 production-ready applications ahead of schedule.
- Engineered comprehensive right-to-left (RTL) architectures and deep Arabic localization systems to drive regional adoption across the MENA market.

Flutter Developer | Focal Point Feb 2023 – Feb 2024 | Remote

- Designed robust scheduling architectures and seamless synchronization across different time zones and devices for EdTech and consulting platforms.
- Integrated low-latency WebRTC protocols to power live multi-modal chat and video interactions, sustaining performance for a user base exceeding 200,000 active users.

Flutter Developer | Lepgo Jan 2022 – Feb 2023 | Remote

- Built a cross-platform product exchange and rental application from scratch, taking full ownership of the initial architecture.
- Improved UI/UX by developing highly customized widgets and implementing scalable state management solutions.

SELECTED PROJECTS

Air Cairo | Aviation & Travel Booking Platform

[Google Play](#)[App Store](#)

- Developed a comprehensive cross-platform aviation application to streamline complex flight booking workflows and passenger management.
- Engineered robust API integrations to reliably handle dynamic flight schedules, interactive destination guides, and automated travel alerts.

Khamato | B2B/B2C E-Commerce Marketplace

[Google Play](#)[App Store](#)

- Built a high-performance construction materials marketplace featuring deep product catalogs, dynamic cart state management, and real-time order tracking.
- Integrated secure, multi-vendor payment processing gateways to handle complex B2B transactions seamlessly.

Jeras App | EdTech & E-Learning Platform

[Google Play](#)[App Store](#)

- Developed a highly scalable educational platform supporting real-time scheduling, progress tracking, and multi-modal communication.
- Integrated low-latency WebRTC protocols to power seamless live video and audio interactions, optimizing performance to support a massive user base exceeding 200,000 users.

Dream App | Consultation Marketplace Platform

[Google Play](#)[App Store](#)

- Architected with a scalable marketplace ecosystem connecting users with specialized consultants, featuring dynamic scheduling, calendar synchronization, and automated notifications.
- Engineered secure in-app payment processing workflows and robust real-time messaging architectures to ensure reliable, seamless client-consultant interactions.

Coldwell Banker Ecosystem (Cold-Well & CB-Link) | Enterprise Real Estate

[Google Play](#)[App Store](#)

- Led the technical development of a dual-platform real estate ecosystem: a B2C property discovery app (Cold-Well) and a secure internal B2B broker management tool (CB-Link).
- Implemented complex, map-based property search queries, geolocation tracking, and dynamic form submissions for agent deal management.

Fares App (Client & Admin) | Legal SaaS Platform

[Google Play](#)[Google Play](#)

- Architected with a comprehensive dual-application ecosystem for legal practices to manage cases, clients, and internal operations.
- Engineered secure financial dashboards and automated invoicing systems, ensuring high data integrity and synchronization between client-facing and admin applications.

Mannetho | Advanced Machine Learning Integration

[App Store](#)

- Engineered complex on-device machine learning capabilities utilizing TFLite to perform real-time text detection and image inference directly on the mobile client.
- Optimized inference methods and resolved deep architectural null-check barriers to ensure instantaneous processing without relying on server-side latency.

*Additional production applications delivered include **Dream App** (Consultation Marketplace), **Sanita** (Consumer Goods E-commerce), and **Dasar** (Sales & Logistics Exhibition Tool) and more*

TECHNICAL SKILLS

- Languages & Frameworks: Dart, Flutter, C#, Python, C++, Flutter Web.
- Architecture & State Management: Clean Architecture, MVVM, BLoC, Cubit, GetX, Provider, Server-Driven UI (SDUI), App Modularization.
- Design Patterns & Core Principles: SOLID Principles, Dependency Injection (GetIt, Injectable), Singleton, Strategy, Observer.
- APIs, Data & Backend: GraphQL, RESTful APIs (HTTP, Dio), WebRTC, Socket.IO, Real-time data synchronization, JSON Handling.
- Firebase Ecosystem: Auth, Firestore, Realtime Database, Cloud Functions, Cloud Messaging (FCM), Crashlytics.
- Advanced Capabilities: On-device Machine Learning (TFLite), Deep RTL & Arabic Localization Architecture, Google Maps & Geolocation, Native Method Channels, Custom Utility Development.
- Performance & Optimization: Isolate threading for background processing, caching strategies, lazy loading, memory leak resolution.
- Payments & Integrations: In-app payments (Stripe, Paymob, Tap), WebView-based payment gateways.
- Dev Tools & CI/CD: Git, GitHub Actions, BitBucket, Fastlane, App Flavors, Code Generators (Freezed, Retrofit, JSON Serializable), Postman, Android Studio, VS Code, Xcode.
- Testing & Deployment: Unit Testing (Mockito, bloc_test), Google Play Console, App Store Connect.

CORE COMPETENCIES

- **Technical Leadership & Ownership:** Taking end-to-end responsibility for the mobile development lifecycle, from initial system design to App Store/Play Store deployment and post-launch stability.
 - **Architectural Decision-Making:** Evaluating project requirements to select the most scalable architectures, state management solutions, and optimal third-party integrations.
 - **Cross-Functional Collaboration:** Partnering closely with UI/UX designers, backend engineers, and product stakeholders to ensure seamless API integration and pixel-perfect UI execution.
 - **Client & Stakeholder Communication:** Translating complex business requirements into actionable technical strategies and clear development milestones.
 - **Agile & Scrum Methodologies:** Actively driving sprint planning, participating in code reviews, and continuously optimizing development workflows for faster delivery.
 - **Complex Problem Resolution:** Proactively identifying architectural bottlenecks, resolving memory leaks, and reducing technical debt to ensure high-performance production releases.
-
